## Waxing

### Pinks Boutique 100% Natural and Organic waxing

#### Why should I have organic waxing?

Pinks Boutique Organic waxing uses only Soil Association certified pre and post wax products and whilst the base techniques remain the same we have added in some of the special touches we are famous for. Standard Pre wax cleansers generally have a very high alcohol content and strip your skin unnecessarily of its vital moisture. After waxing, every hair follicle is open and the products applied to this area have direct access to the bloodstream. The Pinks Boutique after wax calming lotion which will be used on you is free from all of the paraben preservatives and toxins which standard lotions contain, thus preventing any unwanted chemicals from entering the body. Smooth calmed chemical free skin.

Using Pinks Boutique Soil Association Pre and After wax lotions to ensure that your skin has no parabens, GM or toxic chemicals added to it during your waxing

#### Before & After Care

A speedy removal of unwanted body or facial hair. Using the latest PHD Safe Wax System.

A smoother, softer alternative to shaving and longer lasting than cream.

Safe, hygienic and suitable for all skin types. Lasts for 6-8 weeks.

#### Be prepared!

Follow these guidelines before and after your Safewax treatment.

#### Before & After:

Do not sunbathe or use a sunbed

Do not exercise vigorously and avoid activities such as gardening

## Pure Minerals

The standard assortment of our new series **Pure Minerals** contains products to prime, cover up and fixate in different versions, as well as special brushes for our mineral products. Additionally, in our professional assortment you can choose between the extensive colours of blushers, eyeshadows and innovative products.

All products from our series **Pure Minerals** contain a pure, premium mineral complex consisting of zinc, magnesium, potassium and sodium. Zinc and magnesium relax the skin, refresh and rejuvenate you. Potassium and sodium bind moisture in the skin and so prevents it from premature dehydration. The products leave a natural, perfectly covered up complexion, without clogging up the pores or making the skin look like a mask. Small wrinkles and enlarged pores are optically reduced. Simultaneously, the minerals in the products protect against UV rays and are water and sweat repellent.

Our **Pure Mineral** products contain neither chalk, wax nor oils and are therefore extremely agreeable with the skin.
